Maksym Kryvokhvost

Development Team Lead / Full stack developer / Wordpress developer

Summary

Passionate, development team lead and full stack developer who is not scared of hard projects, new technologies, and deadlines.

My desire is to always grow, analyze and improve, so I really appreciate space for this. Feel at home in companies where diligence and creativity are highly valued.

Experience

Sep 2016 - present

Development Team Lead

FERVENT - Strategic Communications Agency (Sweden)

- Managed a web development team, consisting of 1 designer and 1- 4 developers.
- Prototyped development architecture for **gudstjanst.se** and many other different projects. We turned pdf book into a planning tool with a lot of different functions. Also, worked on this project as a lead front-end developer with backbone.js as the main technology.
- Had responsibility for direct communication with clients and estimation process.
- Kept deadlines and estimations, which turned the company from non-profitable to a profitable organization.
- Fitted a project with the growth of 30-40% over the estimation into development team hours budget (**sam.ferventdev.com**). The project is on the launch stage.
- Created JIRA environment and optimized development process.
- Have helped the company to make switch from development organization to startup **startwiththeheart.co** and **heartmanagement.org.**
- For some period was involved in customer support through Zendesk. Increased speed for closing tickets in a few times and have built deep relationships with clients.
- Built new support agreement contracts (with advanced security to prevent not paid hours) and was an initiator of many different improvements in the company, such as development standards, development team building etc.
- Have deep experience with speed Wordpress optimization and New Relic usage.

Technologies Used: PHP / jQuery / Javascript / HTML / CSS / MySQL / Git / Backbone.js / Underscore.js / MySQL / Agile / Scrum / New Relic
**CMS Involved:** Wordpress, Joomla
Frameworks involved: Yii Framework 2.
PM Systems: JIRA
